

Ohio Nutrient Forum Workshop

Nutrient Removal Program Examples, Related Regulatory Actions & Funding

Bill Meinert, O'Brien & Gere
November 14, 2012 – Columbus, OH

Voluntary vs. Involuntary?

■ Carrot

- ▶ Lower-interest or longer-term loans, grants
- ▶ No federal assistance?

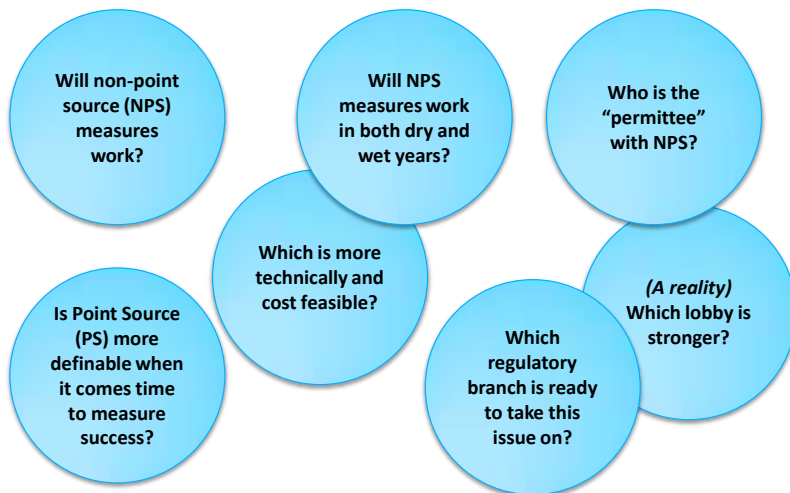

■ Stick

- ▶ NPDES, TMDL, Gulf Hypoxia / EPA Action

■ Controls

- ▶ Preliminary engineering technical and financial review
- ▶ Loan and/or grant program policies and procedures
- ▶ Grant eligibility determination
- ▶ Voluntary tied to two-party agreement
- ▶ Involuntary (and voluntary?) tied to NPDES Permit

Point Source vs. Non-Point Source

3

Seminars\2010\NutrientRemovalSeminar_0910\Ppresentations

Cost Feasibility

- **Priorities** for financial assistance?
- At first, **financial incentives** for readiness-to-proceed?
- Then, **financial controls** monitoring cost-effectiveness?
- **Affordability?** Benchmark sewer rates? Use HMI measure?
- Technology **grant eligibilities** times local-share eligibility equals what cents-on-the-dollar range and average for State funding?
- **What funds** the Grant Program?
- **How** are grant monies distributed?
- Then other subtleties such as... financial incentives for different levels of treatment?

4

Seminars\2010\NutrientRemovalSeminar_0910\Ppresentations

EXAMPLE PROGRAMS

Things To Think About When You Think of Nutrient Removal

5

Gulf of Mexico Hypoxia & Pending Nutrient Removal Program

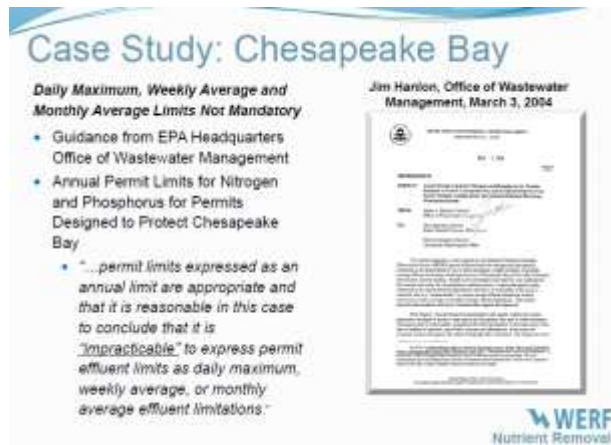

- Point Source Nutrient Removal (NR) Levels, "Likely Effluent Limits"?
 - ▶ Biological NR – 8 mg/L TN, 1 mg/L TP
 - ▶ Advanced NR – 5 TN, 0.5 TP
 - ▶ Enhanced NR – 3 TN, 0.1-0.3 TP
- Non-Point Source controls, BMPs, offsets, credits
- 2013 TMDL?
- Pending Far-Field impacts on Ohio?

6

Gulf Hypoxia Program may look a lot like Chesapeake Bay's

- Much of the basis, the 30-year-old Chesapeake Bay Program

7

FY 2011 Operating Plan...

- Planning, documentation, working towards 2013 program update

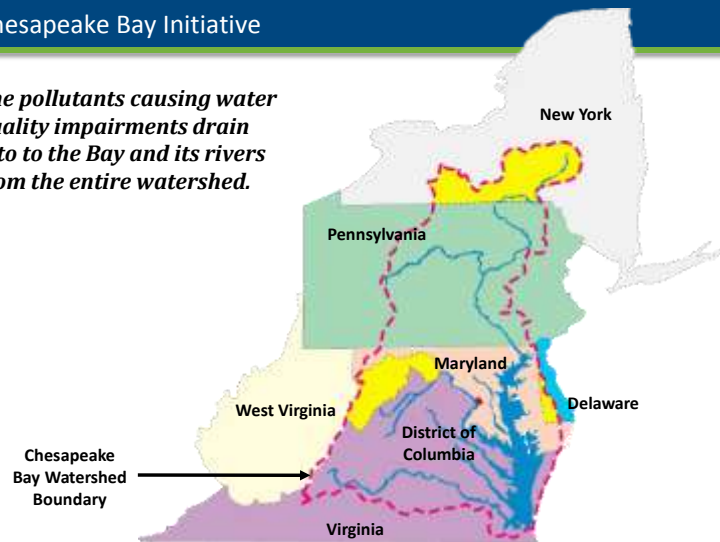

8

Chesapeake Bay Initiative

The pollutants causing water quality impairments drain into to the Bay and its rivers from the entire watershed.

9

Sources of Nutrients

■ WHAT, WHERE, WHY

- Public education program

10

Seminars\2010\NutrientRemovalSeminar_0910\Presentations

Chesapeake Bay Program – applicable to Ohio, or Gulf Initiative?

11

Chesapeake Bay Program – applicable to Ohio, or Gulf Initiative?

- A 30-year-old Chesapeake Bay Program

Nothing could be more underscored than quality for enforcement, or less monitoring. The time for action and stewardship is now.

12

Chesapeake Bay Program – applicable to Ohio, or Gulf Initiative?

- For the public, calibrating to the 1600s

13

Source of Nutrients

■ WHO, WHAT, WHERE

- Cap Load allocations by state (*changed with 2010 Bay TMDL ...*)

| State | Nitrogen Allocation (million lbs./yr.) | Phosphorus Allocation (million lbs./yr.) |
|-------------------------|---|---|
| Pennsylvania | 72 | 2.3 |
| Maryland | 37 | 2.9 |
| Virginia | 51 | 6.0 |
| District of Columbia | 2 | 0.3 |
| New York | 13 | 0.6 |
| Delaware | 3 | 0.3 |
| West Virginia | 5 | 0.4 |
| Subtotal | 183 | 12.8 |
| Clear Skies Reduction | -8 | |
| Basin-Wide Total | 175 | 12.8 |

14

Nutrients – Maryland

■ WHO, WHAT, WHERE

- Load reductions – Maryland example

15

Nutrients – Maryland

Maryland - All WWTPs (Planned)

16

Nutrients – Maryland

(MDE was developing "weighting factors")

17

Nutrients – Maryland

■ WHO, WHAT, WHERE

- Load reductions – Maryland example
 - 206 and growing, 68 "major"

18

Nutrients – Maryland

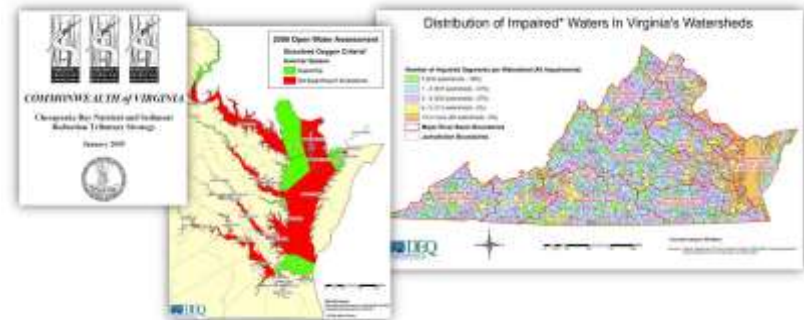

■ WHO, WHAT, WHERE

- ▶ Point sources first, again
 - › BNR to ENR, some secondary to ENR
- ▶ TN 3, TP 0.3 - everywhere
- ▶ State loan program, State grant program
 - › Fund for plants
 - › Fund for septs and agriculture
 - › Funding for State administration
 - › Certain earmarks
- ▶ Flush tax (initial \$2.50/month/EDU) – everyone
 - › Sewer users, septs, other “equivalents”
 - › Doubled in 2012

Nutrients – Virginia

■ WHO, WHAT, WHERE

- ▶ Load reductions – Virginia example
 - › 1990s scrapped the car tax and BNR, no flush tax
 - › Growing, 125 “significant” (not EEE), catching up

Nutrients – Virginia

■ WHO, WHAT, WHERE

- Waste load allocations, “footnotes” (the race was on)

[illegible]

Nutrients – Virginia

■ WHAT, HOW

- ▶ Rules of the game – readiness, eligibility

[illegible]

Nutrients – Virginia

■ WHO, WHAT, WHERE

- Load caps and trading – Virginia example

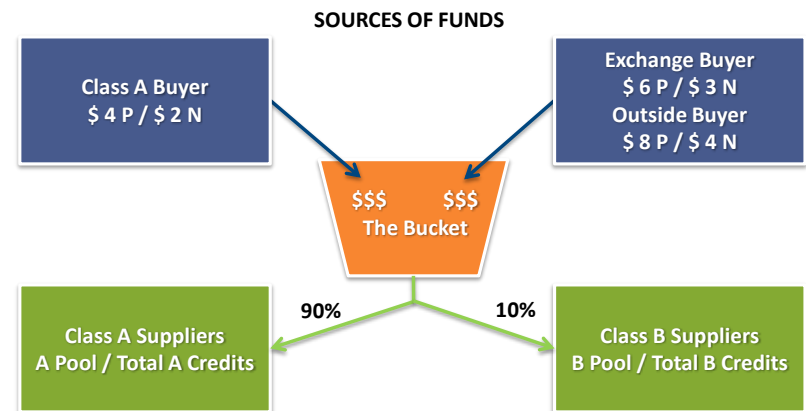

Upgrade projects generally are retrofits, some with expansion, in the range of 50-80% “eligible”, with grants around \$0.15 to \$0.35 on the dollar.

23

VNCEA Trading

- Legislature -> General Permit -> Cash Flow and “The Bucket”

24

VNCEA Trading

■ Base case, credits, shortfalls

| Credits Generated and Demanded, lbs. | | | | | |
|--------------------------------------|-------------|---------|---------|---------|--------|
| Facility | All Credits | Class A | | Class B | |
| | | Supply | Demand | Supply | Demand |
| P-1 | 68,492 | 30,000 | | 38,492 | |
| P-2 | 34,246 | 20,000 | | 14,246 | |
| P-3 | -13,698 | | -16,000 | 2,302 | |
| P-4 | -15,023 | | -12,000 | | -3,023 |
| P-5 | -4,566 | | -8,000 | 3,434 | |
| Total | | 50,000 | -36,000 | 58,474 | -3,023 |

| Compliance Plan Positions (Class A) | | | |
|-------------------------------------|-------------------|--------|---------|
| Facility | Design Flow, MGD | Supply | Demand |
| P-1 | Upgrade to 6 mg/L | 30,000 | |
| P-2 | Upgrade to 6 mg/L | 20,000 | |
| P-3 | Upgrade to 6 mg/L | 8,000 | |
| P-4 | No upgrade | | -12,000 |
| P-5 | No upgrade | | -8,000 |
| Total | | 58,000 | -20,000 |
| Net Credits | | | 38,000 |

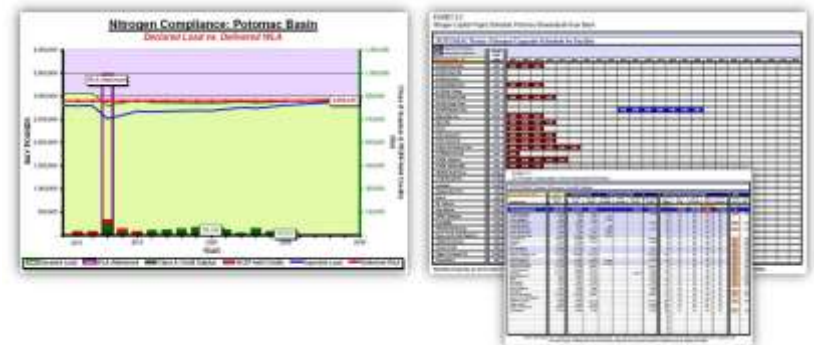

25

Nutrients – Virginia

■ WHAT, HOW

- ▶ VNCEA participant, non-participant
- ▶ Individual Permit, General Permit, exchange

26

Nutrients – Pennsylvania

■ WHAT, HOW

- ▶ Initial “Growing Greener” grants for non-point
- ▶ Behind the curve (MD, VA, 2010 TMDL)
- ▶ First point source “top-20” and beyond, then “21-100”
- ▶ Experimenting with NPS-to-PS trading
- ▶ Tributary strategy ...

| Point Source | Location | Priority Rank | Priority Score |
|-------------------------|-----------|---------------|----------------|
| ALLEGHENY STEEL COMPANY | ALLEGHENY | 1 | 100.0 |
| ALLEGHENY STEEL COMPANY | ALLEGHENY | 2 | 99.0 |
| ALLEGHENY STEEL COMPANY | ALLEGHENY | 3 | 98.0 |
| ALLEGHENY STEEL COMPANY | ALLEGHENY | 4 | 97.0 |
| ALLEGHENY STEEL COMPANY | ALLEGHENY | 5 | 96.0 |
| ALLEGHENY STEEL COMPANY | ALLEGHENY | 6 | 95.0 |
| ALLEGHENY STEEL COMPANY | ALLEGHENY | 7 | 94.0 |
| ALLEGHENY STEEL COMPANY | ALLEGHENY | 8 | 93.0 |
| ALLEGHENY STEEL COMPANY | ALLEGHENY | 9 | 92.0 |
| ALLEGHENY STEEL COMPANY | ALLEGHENY | 10 | 91.0 |
| ALLEGHENY STEEL COMPANY | ALLEGHENY | 11 | 90.0 |
| ALLEGHENY STEEL COMPANY | ALLEGHENY | 12 | 89.0 |
| ALLEGHENY STEEL COMPANY | ALLEGHENY | 13 | 88.0 |
| ALLEGHENY STEEL COMPANY | ALLEGHENY | 14 | 87.0 |
| ALLEGHENY STEEL COMPANY | ALLEGHENY | 15 | 86.0 |
| ALLEGHENY STEEL COMPANY | ALLEGHENY | 16 | 85.0 |
| ALLEGHENY STEEL COMPANY | ALLEGHENY | 17 | 84.0 |
| ALLEGHENY STEEL COMPANY | ALLEGHENY | 18 | 83.0 |
| ALLEGHENY STEEL COMPANY | ALLEGHENY | 19 | 82.0 |
| ALLEGHENY STEEL COMPANY | ALLEGHENY | 20 | 81.0 |

27

Nutrients – Pennsylvania

■ WHAT, HOW

- ▶ DEP Chesapeake Bay Steering Committee
- ▶ Work with MD (Susquehanna River)
- ▶ Point source work group
- ▶ Implementation for sewage facilities planning
- ▶ Implementation for NPDES permitting
 - › Cap at Design Q
 - › Cap Ex. at 6 TN, 0.8 TP
 - › Phase in with NPDES
 - › Able to trade or offset
- ▶ 2010 TMDL vs. PA plan
- ▶ Sediment and dams?

| Table 1. Support for Best Management Practices that have been Pre-Approved and DEP-Approved for Phase 1 of the Chesapeake Bay Program Watershed Study | | | | | | | | | |
|---|---------|---------|---------|---------|---------|---------|---------|---------|---------|
| Watershed | Phase 1 | Phase 2 | Phase 3 | Phase 4 | Phase 5 | Phase 6 | Phase 7 | Phase 8 | Phase 9 |
| ALLEGHENY | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 |
| ALLEGHENY | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 |
| ALLEGHENY | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 |
| ALLEGHENY | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 |
| ALLEGHENY | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 |
| ALLEGHENY | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 |
| ALLEGHENY | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 | 100.0 |

28

[illegible]

Construction Market Conditions

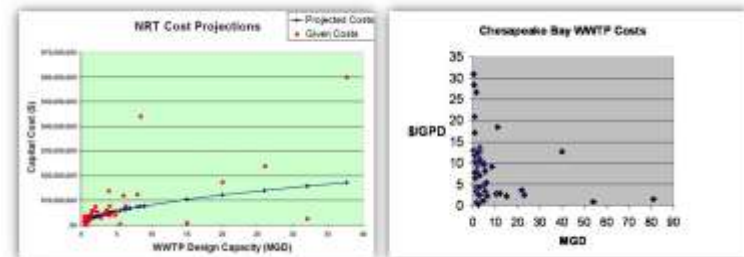

- Timing is everything
 - MD was underway, VA surprised, PA starting up in a downturn...

31

Construction Market Conditions

- Estimate, complications, recalibrate
 - Before, after

32

Technology and Regulations

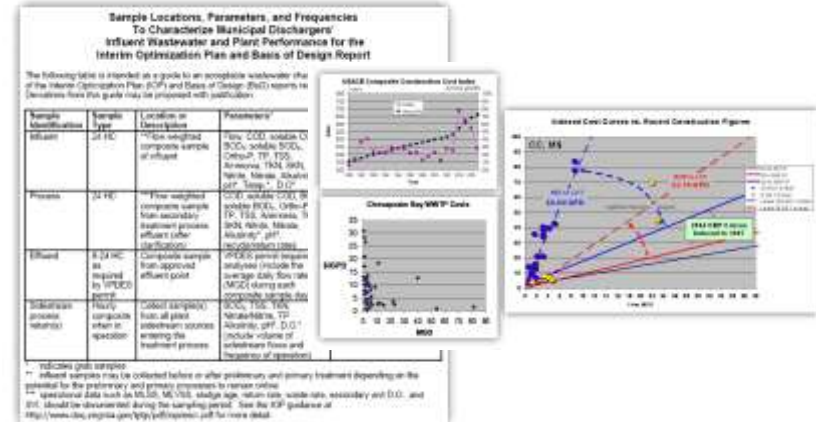

- Behind the times and requirements

33

Technology and Regulations

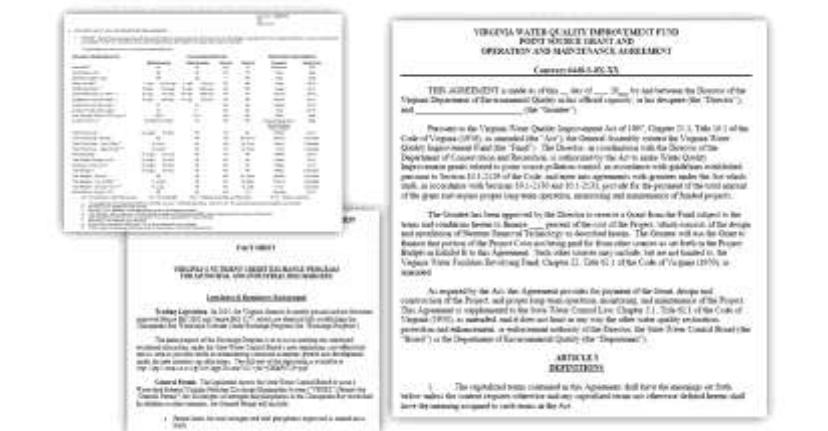

- Influent / effluent characterization, standardize

34

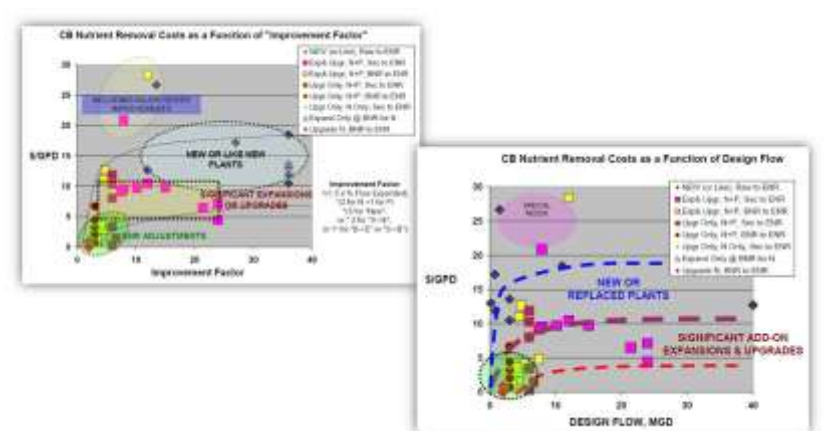

Technology and Regulations

- Grant agreements, permits, trading commitments

Everything, Everywhere, Everyone?

- Gulf of Mexico Initiative

Some information from the OEPA Workgroup

- According to EPA ECHO data – Ohio (2010)
 - ▶ 94 “Majors” with TP limits
 - ▶ 161 Majors with Nitrogen limits (vast majority Ammonia-N?)
 - ▶ 201 Majors (accurate? others?)
 - ▶ The OEPA list – 230 if 1-MGD rating cutoff, 326 if 0.5, 363 if 0.4
 - ▶ Ex's , Significant Dischargers (N,P) – MD 68, VA 125, PA 165
- NR Challenges
 - ▶ Nutrient Removal may becoming THE controlling factor
 - ▶ Large vs. small POTWs – technologies
 - ▶ CSO or Wet Weather Management challenges
 - ▶ Other local water quality limits may be drivers
 - ▶ Industrial Sewer Use Regulations and surcharges for N or P?

37

File Location

Key Issues in Your Region

- Midwest states are headwater states
 - ▶ Local WQ may dictate, Gulf delivery factor is your friend
 - ▶ POTW vs. Indirect discharge? Majors vs. all?
- Understanding the science
 - ▶ Gulf model, local TMDLs, NR processes
- Shaping a regulatory program
 - ▶ Timing, politics, administration, targets, and phasing
 - ▶ Burn both ends of the candle? (Gulf, local TMDLs) (& SSO/CSO)
- Political decisions by state
 - ▶ Share of reduction and when, where, why, how
- NR will require updating aging infrastructure (\$\$\$)
- Decisions regarding financing a program (incentives, control)
 - ▶ Loan, grant, local, tax(?), distribution

38

Ohio POTWs – Statistics

- Point of Diminishing Returns?
 - ▶ In achieving further TP removal, given Great Lakes Initiative?
 - ▶ Based on Plant Size?
 - ▶ Different for Ohio River vs. Lake Erie? TP, TP + TN, TN, TN + TP?

39

File Location

Ohio POTWs – Potential?

- Largest 100 POTWs (cutoff around 4-MGD rating)
 - ▶ 1,513 MGD Design Flow
 - › Actual % of Design? Expected increase in next 5, 10, 20 years?
 - ▶ 1 mg/L TP removal avg at all 100 POTWs is 3.45 M #/yr, if at 75%
 - ▶ 8 mg/L TN removal avg at all 100 POTWs is 27.6 M #/yr, if at 75%

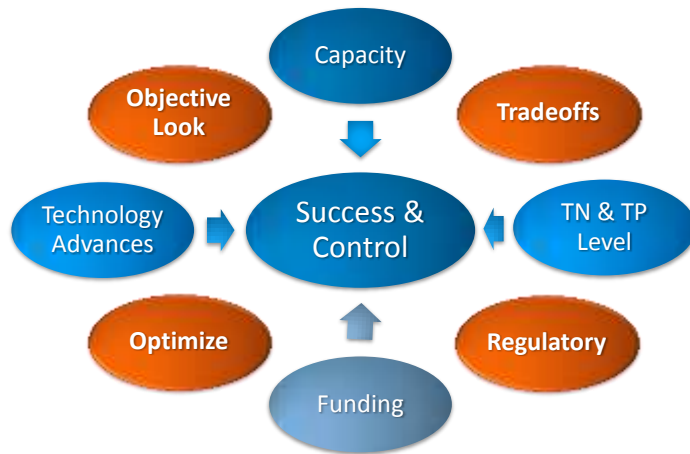

40
